

PfE Policy JP-C2: Digital Connectivity Statement:

The purpose of the Digital Connectivity Policy is to establish guidelines for enhancing digital infrastructure, ensuring access to reliable and fast internet services, and promoting digital inclusion for all individuals and communities. This policy aims to bridge the digital divide, foster economic growth, and support the effective utilization of technology across all sectors of society

Scope:

This policy applies to all governmental bodies, private sector partners, and relevant stakeholders engaged in the development, delivery, and regulation of digital connectivity services, including broadband and mobile networks. It covers both urban and rural areas, with particular emphasis on underserved and disadvantaged regions.

1. Access to High-Speed Internet

Goal: Ensure that all individuals have access to affordable, reliable, and high-speed internet services.

Action Plan:

Promote the expansion of broadband infrastructure in underserved and remote areas.

Facilitate public-private partnerships to enhance network reach and capacity.

Subsidize internet access in rural, low-income, and marginalized communities to reduce financial barriers.

All the apartments will have access to ethernet port one of them will provide a Wi-Fi access point. So, each individual apartment will have secure Wi-Fi in each apartment.
