

67619 – 82 Bolton Street, Bury

Changes to elevations and glazing including- Replacement of glazing system with blue brickwork and anthracite aluminium frame glazing; Black plastic soffits and new dark coloured window frames on first floor; New access door to the front elevation

Following some minor amendments to the original proposed scheme and an agreement to accept a condition to ensure roller shutters appropriate to the character and appearance of the conservation area are installed, the proposal is now considered acceptable as it would be neutral in terms of impact on that part of the conservation area and as such would at least preserve its character and appearance.
