Description of the Proposal

Please note in regard to:

- Fire Statements** - From 1 August 2021, planning applications for buildings of over 18 metres (or 7 stories) tall containing more than one dwelling will require a 'Fire Statement' for the application to be considered valid. There are some exemptions. [View government planning guidance on fire statements](#) or [access the fire statement template and guidance](#).
- Permission In Principle** - If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.
- Public Service Infrastructure** - From 1 August 2021, applications for certain public service infrastructure developments will be eligible for faster determination timeframes. See help for further details or [view government planning guidance on determination periods](#).

Description

Please describe details of the proposed development or works including any change of use

The proposal relates to energy-efficiency improvement works to a second-floor residential flat with a floor area of approximately 41 sqm. The works are being undertaken as part of the ECO4 scheme to improve the thermal performance and overall energy efficiency of the property.

The proposed internal works include the installation of a new central heating system comprising a gas boiler with radiators, the upgrading of loft insulation to a depth of 270mm, and the installation of internal wall insulation to improve heat retention.

External alterations are limited and will consist of the addition of a boiler flue and a suitably sized wall vent on the external elevation. These elements are required for the safe operation and ventilation of the new heating system and will result in a minor change to the external appearance of the building.

No change of use is proposed. The property will remain in residential (C3) use.

Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:

Over 25 square metres

Please justify the reason why biodiversity net gain does not apply:

Biodiversity Net Gain (BNG) does not apply to this proposal because the development involves only minor works to an existing second-floor flat and does not impact any land, habitat, or external ecological features. The proposal includes internal energy-efficiency upgrades and two very small external additions (a boiler flue and wall vent), all of which take place entirely within the existing built fabric. The site contains no soft landscaping, no green areas, no private garden space, and no natural habitat that could be affected by the works. There is no demolition, no footprint extension, and no ground disturbance. As such, the development falls below the thresholds for works that require BNG assessment under the Biodiversity Gain Regulations. Because the works result in no habitat loss, no alteration of existing land, and no ecological impact, BNG requirements do not apply to this planning application.

Note: Please read the help text for further information why developments may be exempt or not in scope.

The building is not listed therefore no listed building consent is required.

Only planning permission is required for the proposed external alterations or additions to the building.

The suggested application description is therefore:

External extraction flue and extraction units to rear elevation. This you can amend, as you will know the details of what is going to be required externally and where.

There is no fee for a listed building consent application but there is a nationally set planning application fee of £298. There is no VAT.

The application must include existing and proposed elevations showing where the development is proposed and a brief reference to the Conservation Area by way of a short heritage assessment.

Your application must be accompanied by the information detailed and the appropriate fee. The application cannot be validated by law without the required fee and information.
