

**Application for the demolition of a poultry shed and its replacement with
larger building . Sillinghurst Farm, Castle Hill Road, Bury. BL9 6UN**

Ref: DT.299226.C

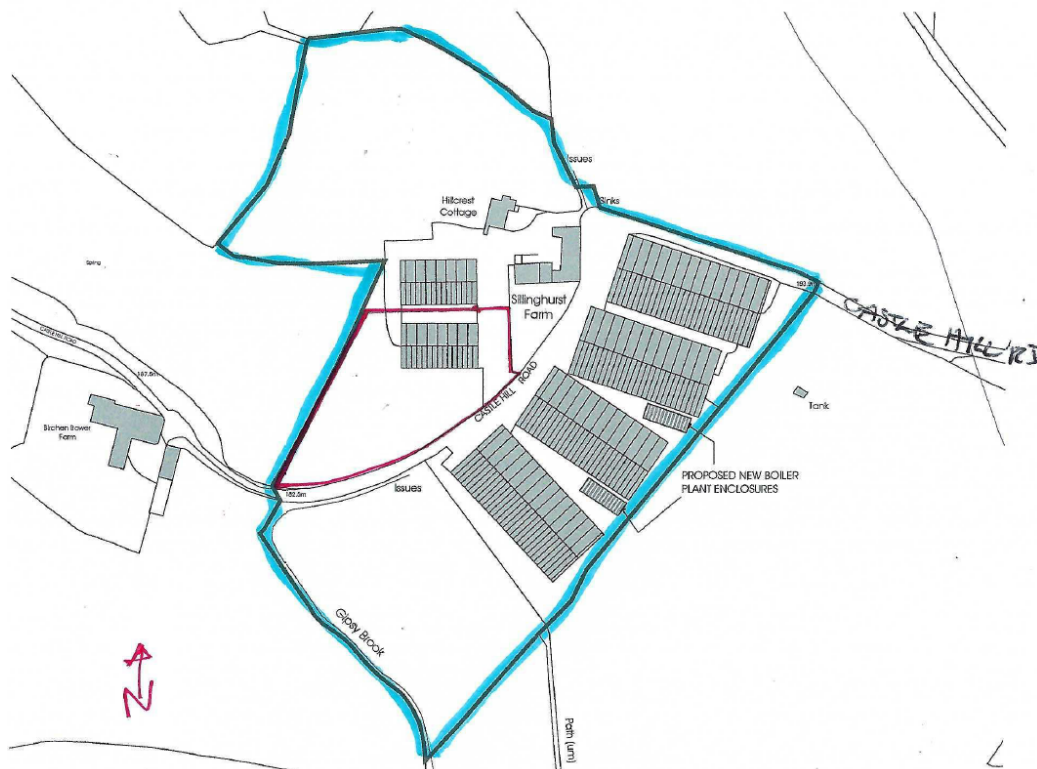

Coal Risk Assessment

Sillinghurst Farm is an agricultural unit consisting of several large poultry buildings.

The proposed development is for the demolition of one of the units with a floor area of approximately 660m² and to replace it with a larger building of 1300m².

The existing building to be demolished is within a high risk coal area, though the proposed replacement building would extend its footprint onto abutting land which lies outside the high risk area: -

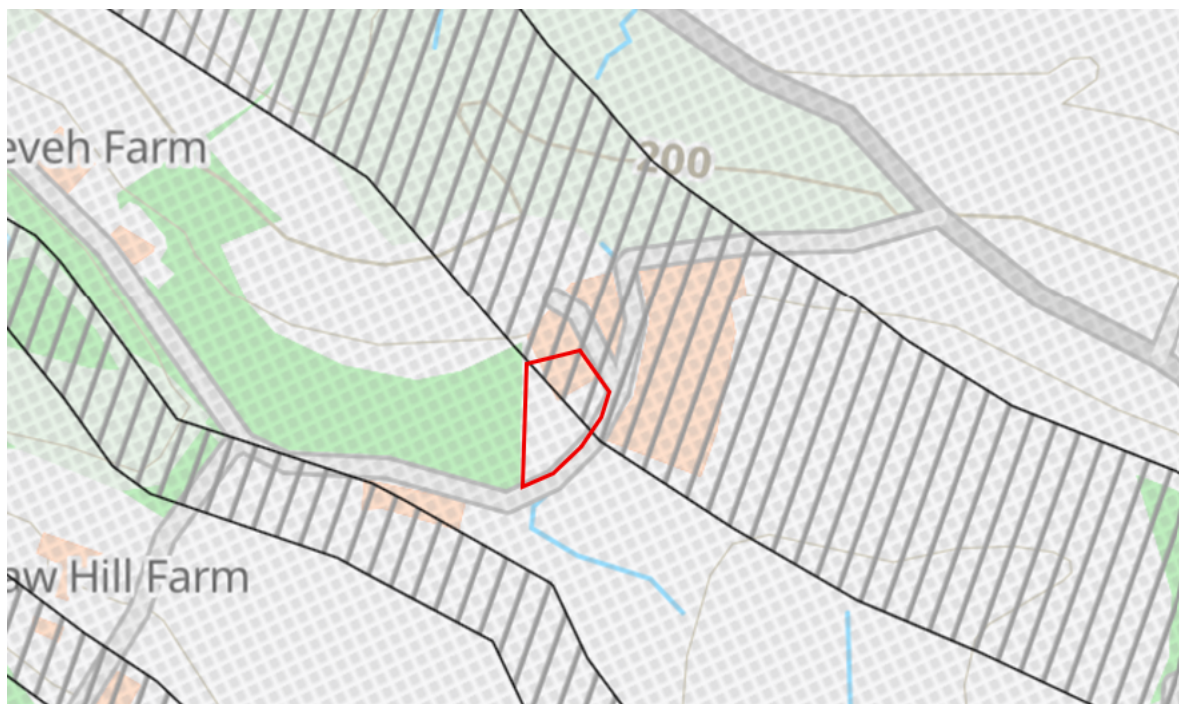

As existing

Proposed siting of the replacement building

Extract from the Coal Risk Map of the Mining Remediation Authority: -

There has been no evidence or instances of subsidence or collapse with regard to the building to be replaced, while the remainder of the site , other than a small part, is

not within the high risk area.
