

Condition 4 – Ecological Enhancements (Application No. 66142)

Ecological enhancements can include either a native tree, bird box or bat box. The Bat Survey prepared by Verity Webster in Sept. 2022 recommends the: “...the provision of bird boxes” to “...improve nesting opportunities”.

One specific suggestion is the Schwegler 1MR Bird Nest Box. A picture of this is shown to the left and taken from

<https://www.nhbs.com/1mr-schwegler-avianex>

I have found a more realistically priced alternative, the “Alicante” bird box (see picture on left) which is sold at:

<https://www.birdfood.co.uk/woodstone-alicante-32mm-oval-hole-nest-box-brown>

DETAILS

Nest Box Hole Size
Oval

Colour
Brown

Material
FSC® Certified Wood, Woodstone

Width
22.5cm

Length
15cm

Height
26cm

Diameter
32mm

The Alicante is made from a mixture of concrete and wood fibres and is similar in construction and design to the Schwegler. The Alicante has a 32 mm oval hole and is suitable for House Sparrows, Redstarts, Tree Sparrows and Great Tits.

I have already purchased three of the Alicante bird boxes (Order no. U168806 on 24/03/2022) and I propose to place one on the north facing wall of my property in the region of the ground floor Kitchen / 1st floor family bathroom. It would be at least 2m above ground level. I can carry out this installation now if required.

With your agreement I can potentially place another birdbox on the north facing side of the garage wall when it is fully constructed. Alternatively I can offer one or two bird boxes to a neighbour to put on trees in their property, although guarantee this offer will be accepted and acted on.

The order is detailed below.
