Subject: FW: Initial Consultation on Planning Application

Hi Dean,

The application makes reference to the need to redirect a section of public footpath and to reduce the width of another section. If this is required, it would have to be achieved via a diversion order to redirect and a closure order to reduce the width. Is there any way the applicant can rethink the proposals to avoid this requirement?

These would have to be applied for through the Sec of State (Sec 247 Town and Country Planning Act) and could be refused/create delays.

Regards

David
