Subject: Re: 69572 137 The Rock, Bury, BL9 0ND

Hi Dean

Really sorry our Ops Manager has been on leave and I wanted his view on this before I replied.

At the current time, we have no objections to the waste collection plan shown. We would be able to service the bin through the gate with our vehicle waiting positioned on The Rock (as long as this is okay from a Highways perspective).

The above will apply if it qualifies as a domestic premise. This is if there is individual council tax for each property which would be paid by the resident. If the council tax is paid for by someone acting as a landlord or the company that will run the supported living then this would be commercial waste and would therefore be a charged service.

Just to note, in the future depending on government strategies on Waste we may need to incorporate recycling in all properties in some form and there is no space to incorporate this at this site. It is not an immediate issue though and may never happen. At present, two general waste 1100l bins would be sufficient and would be incorporated into one of our Town Centre flats routes on a fortnightly basis. Again this would apply if the dwellings count as domestic.

Kind Regards

Cameron Goggins
Waste Technical Officer
Department of Operations
