Good afternoon Claire,

Thank you for the opportunity to comment this application.

A Crime Impact Statement (CIS) should be a comprehensive report that identifies the crime and disorder effects of the development and provides measures to mitigate the risk, produced by a competent individual/organisation independent of the design process. The submitted Crime Impact statement has no crime stats therefore it is unknown whether the proposed measures are adequate. There are recommendations within the report that are not shown in the drawings.

If the Council is minded to approve this application, I have the below recommendations:

- The CIS says the entrance and glazed elements are to be secured with shutters, but this is not shown on the drawings. If shutters are installed, they should be certified to a burglary resistant standard. If shutters are not installed then the glazing should be laminated glazing.
- Staff should be provided with a secure area to store personal belongings.
- All high value equipment (e.g. computers, projectors, flat screen monitors / televisions, tools etc.) should be property marked and securely fixed or stored to deter damage / theft. An accurate record should be maintained which logs all such items.
- The development should be complete to the SBD standards.

Best regards,

Matt Granelli
